

## *Sahara*

### *Adhesive system drying device*

The Sahara utilizes infrared heat technology to instantly eliminate excess moisture from the glued surface. This permits a faster, better controlled process time to move the glued unit through production faster.

*No more wait – roll it on and ship it out!*

**quarrata forniture**

*The revolutionary new Sahara heating device uses infrared heat lamps that automatically cycle on and off as a glued unit passes through the machine. It almost instantly eliminates excessive moisture so the product can move through assembly without waiting for air-drying.*

*This unit is ideally used as part of a full glue line positioned between a quarrata adhesive machine, like the Rollflex, and a quarrata mattress press. quarrata can also provide coordinated conveyors for the most compatible efficiency.*

#### SPECIFICATIONS:

- External dimensions: 280 x 220 cm
- Height: 210 cm
- Inside conveyor belt dimensions: 2250 x 2200 mm
- Functioning: electric
- Three IR lamps banks in positioned sequence
- Automatic On/Off operations for IR lamps
- Layers automatically identified for energy saving

*The Sahara can be combined with Rollflex roll-coat glue machine and a mattress press to form a high-speed, highly efficient glue line.*

Global Systems Group® (GSG) is a collection of the world's leading mattress machinery companies. These GSG machinery companies represent leading edge technology in computerized quilting machines and panel cutters; automated and conventional sewing machines; and mattress packaging equipment.
