B45 Border Quilt Machine

Improve border quilting with the same Gribetz International® technology you trust with your mattress panels. The Gribetz B-45 Border Quilter is designed for a more highly efficient border work cell. This machine can produce enough quilted border to accommodate the quilt-panel production of two-panel quilters. Built-in slitter blades enable you to take material straight from the quilter to the border department. The slitter blades' simultaneous side-to-side movement with the carriage travel enables more evenly spaced patterns between border edges.

The B-45's shortened material path between needle bars and slitter blades create more accurate patterns on the mattress borders. The B-45 is a 3-bar multi-needle quilter with most of the same computer controls found on all Gribetz quilters. Popular Class I – IV patterns, including most Tack & Jump styles can be created just like any Gribetz quilter.

Features & Benefits

- Capable of quilting most continuous pattern styles and Tack & Jump patterns
- Built-in slitter blades
- Meets US and CE safety initiatives
- Runs at speeds up to 1,000 rpm
- Gribetz Point & Sew computerized touchscreen controls
- Gribetz Equi-stitch and Pattern Compensation software for prime pattern definition and ideal stitch integrity
