# GS-19 Hot-Melt Glue Line

The Gateway GS-19 Glue Line provides an ergonomic solution to assembling mattress units. Traditional spring units, foam-encapsulated units, and solid foam or latex units can be assembled on the GS19 series with greater efficiency than with traditional methods.

This multi-head system can improve your adhesive operations with greater efficiency and minimal labor requirements.

The GS-19 is available with many options, including your choice of "flexible" glue or a more stout formula depending on your application needs.
