

## **MB-45**

### *Pick and Place System*

Pick and place system from Gateway® Systems is designed to automatically take components from a stack onto a conveyor system or from a conveyor onto a stack.

Suggested layout shown here feeds foam layers into a glue line with stacks of foam being loaded from each side of the infeed conveyor.

SPECIFICATIONS	MB-45
Max weight	25 kg
Width range	550 mm-1750 mm
Length range	1330 mm-2200 mm
Height range	75 mm-200 mm
Max unit stack height	2000 mm

The MB-45 can be configured to pick from two stacks on opposite sides of the loading area or simply pick from a single stack. Framework size and price will vary.

- Ideal for loading a self-aligning infeed conveyor entering a glue line system.
- Loads an average of 2-3 sheets per minute.
- Be sure to specify your needs for the system since each product may require different grip tooling.

Global Systems Group® (GSG) is a collection of the world's leading mattress machinery companies. These GSG machinery companies represent leading-edge technology in computerized quilting machines and panel cutters, automated and conventional sewing machines, material handling solutions, and mattress-packaging equipment.
