PS90

Automatic Unit Stacker

Unit stacker from Gateway® Systems transfers various forms of spring units, finished mattresses, and other materials to carts or other transport equipment.

(All measurements in mm)

*Shown with suggested optional fencing and light beam protection.

SPECIFICATION	PS90
Max. stack height	2.2 m
Capacity	140 units/hr
Footprint	3.2m x 2.4m
Max. unit weight	80 kg

The PS90 automated system transfers various forms of spring units, finished mattresses, and other units to carts or other transport equipment. Its use of motorized belt conveyors eliminates the risk of damage to the units that may be caused by mechanical-picking devices.

- Automatically rises, lowers, and extends to place units into position, then returns to collect the next.
- Sensor devices detect motions and unit positions to efficiently stack springs and beds of all types.
- One of the most effective material-handling systems available for the mattress factory.

Global Systems Group® (GSG) is a collection of the world's leading mattress machinery companies. These GSG machinery companies represent leading-edge technology in computerized quilting machines and panel cutters, automated and conventional sewing machines, material handling solutions, and mattress-packaging equipment.
