

TK491

Panel Cutting/Serging Machine

This multi-tasking serging machine from Teknomac™ cuts quilt panels to size and serges edges in preparation for downstream processes.

The Teknomac TK491 reduces non-value-added labor by combining the panel-cutting and serging processes in one machine – improving your processing time.

- Works when integrated with a multi- or single-needle quilter.
- Programmable features can permit operator to load predetermined sizes for automatic production cycles.
- Uses chainstitch sewing heads with up to four needles.
- One rotary blade cuts in the center of the four stitch lines for crosscut and on the edge of side stitching heads.
- Yield: three panels per minute (regardless the size of panels).
- The machine can work low, medium, and high thickness.

Global Systems Group® (GSG) is a collection of the world's leading mattress machinery companies. These GSG machinery companies represent leading-edge technology in computerized quilting machines and panel cutters, automated and conventional sewing machines, material handling solutions, and mattress-packaging equipment.
