HMI operator's tablet

This new Gribetz hand-held HMI device provides unprecedented mobility and productivity for your quilting operator. Most primary controls are accessible within Wi-Fi range and optional Preventative Maintenance features can improve uptime rates.

Control important quilter functions like:

- Start/stop
- Loop take time
- Other crucial operator functions
- Identify reasons for machine stops
- Service and maintenance features

Optional features can provide Gribetz service staff real-time views of the machine with video feeds for improved immediate assistance.

This mobile device enables your operators to routinely move around the quilter and panel cutter, and perform nearby operations tasks, while still keeping quilter controls at their fingertips.

*Only available for Gribetz Paragon M+ and V16 quilt

machines

**Internet access and Wi-Fi network required for some features.
