# KL-430

The KL-430 is designed to stack quilted mattress panels, bedspreads, and other textiles. The stacking system integrates with the Pro ME panel cut, continuing the flow of goods. The unit features a material recognition system that simplifies the entire process.

## Features & Benefits

- Two transport paths – a horizontal guiding system and a vertical chain system for lifting and stacking of quilted panels
- Multiple clamps ensure secure grip and movement
- Easy-to-use controls provide adjustments for panel size
- Safety light barrier
- Material recognition photo cell system
