Merello ME103 Compact 2-Stage Wrapper

The ME103 makes high-quality packaging available to low-volume producers.

The value-priced ME103 uses the same technology as the popular ME104 and ME105. "Cold Seal" technology and film-fitting methods from Merello produce some of the most appealing packaging in the mattress industry. This smaller wrapping machine can't keep up with the throughput of the ME105, but it can certainly package beds with high-quality seals and cleanly trimmed film.

Features & Benefits

- Create cleanly trimmed mattress packages
- Cold Seal technology reduces poor seals caused by premature film melting before heat cycle completes
- Unique electrical system reduces downtime due to wear and tear on wiring
- Compact size fits into any mattress factory space
