NC2080 Automated Handle Machine

The NC2080 is one of the most creative handle machines in the mattress industry. This programmable handle system can easily attach horizontal handles with a wide range of unique and secure stitching patterns.

This quick and simple system enables an operator to sew consistently good handles with minimal training. This de-skills an otherwise difficult process and enables a mattress producer to add a nice flair to the bed border.

Specifications

Normal rate per handle 20 seconds

Stitches per minute 2500
