Strata Laminator

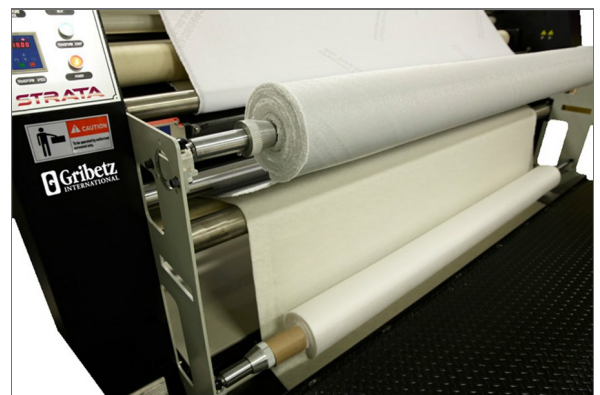

The Strata Laminator is designed for economical lamination products. Adhere FR backing or other materials to ticking for laminated borders, mattress covers, or whatever you need bonded together.

This system uses a roll-fed dry-adhesive layer with no fluid adhesives. That means no overspray and no messy glue buildup to clean and maintain!

Laminate materials up to 90" (229 cm) wide and maintain your inventories and production schedules on your own terms, with the means to produce these items right in your own factory.

*Now available: 5-layer Strata system to include more materials in your product.

**Strata shown here with optional border slitter and wind-up collection mechanism.

Specifications

Footprint dimensions 150" wide x 240" long (381 cm x 610 cm)

Elec requirements 220V/3 phase/60 Hz 100 amps
